SPECIFIC COVERAGE OF POPULAR SCIENTIFIC SUBJECTS

In the "UKRAINIAN WEEK" MAGAZINE

The paper examines modern problems of coverage of popular science topics in the information space of Ukraine, which gave grounds for asserting a sufficiently low frequency of journalists addressing such issues, in particular in print media. Based on the theoretical and methodological works of Ukrainian and foreign scientists, the concept of "scientific journalism" was considered, and the common and different functions of it compared to science were investigated. The formal and substantive features of popular science materials on the pages of "Ukrainian Week", as one of the few domestic magazines that regularly covers similar issues, have been clarified.

Keywords: popular science topics, mass media, scientific journalism.
